

ASLON® EPDM TILES

The Aslon® Epdm tiles are ideally suited for creating an attractive and functional surface for balconies, (roof) terraces, or as a walkway on a gallery. EPDM (Ethylene Propylene Diene Monomer) tiles are rubber tiles featuring a top layer made of EPDM rubber.

EPDM tiles have several excellent properties as a terrace flooring solution for balconies and roof terraces. They are water-permeable and absorb sound and vibrations, contributing to a quiet and pleasant environment.

EASY TO INSTALL

With EPDM tiles, you can easily create an attractive and functional surface. They are easy to install, lightweight, and can be placed directly on the roof covering, with the exception of PVC roof coverings.

WATER-PERMEABLE

The tiles have a studded structure on the underside and immediately drain (rain) water.

SCHOK-ABSORBING

The tiles effectively absorb impact and vibrations.

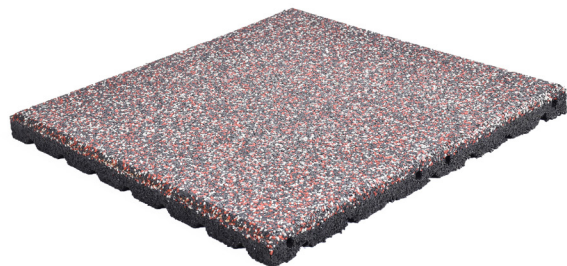

SUSTAINABLE

The tiles are made from recycled rubber granulate and are fully recyclable after use.

SPECIFICATIONS

Colours	Various RAL colours and colour mixes
Sizes	500 x 500 mm 1.000 x 1.000 mm
Thickness	30 mm Other thicknesses available on request.
