

ASLON® NATUREGRASS TILES

The Aslon® NatureGRASS tiles are a high-quality product in which the artificial grass is pressed into the rubber tile during the production process, without reducing water permeability. Thanks to the artificial grass top layer, balconies and (roof) terraces are given an attractive and natural appearance.

APPLICATIONS: (ROOF) TERRACE OR GARDEN

NatureGRASS tiles can be installed easily and directly on top of the roof covering. When renovating a balcony, they are an excellent choice, as they can be placed over an existing floor. They also reduce noise and vibrations, contributing to a quiet and comfortable atmosphere on balconies and roof terraces.

APPLICATIONS: PLAY EQUIPMENT

For playgrounds, NatureGRASS tiles provide a safe, impact-absorbing surface. They combine safety with enjoyment and give the play area an attractive appearance. The tiles comply with the strictest standards for impact attenuation.

SPECIFICATIONS

Colour	Green (Virgo)
Sizes	500 x 500 mm 1.000 x 1.000 mm
Thickness	30 mm Other thicknesses available on request.

WATER-PERMEABLE

The tiles have a studded structure on the underside and immediately drain (rain) water.

SHOCK-ABSORBING

The tiles effectively absorb impact and vibrations.

NATURAL LOOK

The tile combines the comfort of rubber with a natural look, all year round.
