

ASLON® RUBBERTILES

The Aslon® Rubbertiles are ideally suited for creating an attractive and functional surface for balconies, (roof) terraces, or as a walkway on a roof. In addition, they are water-permeable and feature a studded structure on the underside, allowing (rain)water to drain away immediately and the surface to dry quickly. The non-slip rubber texture reduces the risk of slipping.

APPLICATIONS

The rubber tiles have several excellent properties as a terrace flooring solution for balconies and roof terraces. They are water-permeable and absorb sound and vibrations, contributing to a quiet and pleasant environment.

RECYCLABLE

The rubber tiles are manufactured from recycled rubber granulate, making them 100% recyclable after use.

WATER-PERMEABLE

The tiles have a studded underside that allows (rain)water to drain away immediately.

SHOCK-ABSORBING

The tiles effectively absorb impact and vibrations.

SUSTAINABLE

The tiles are made from recycled rubber granulate and are fully recyclable after use.

SPECIFICATIONS

Colours	black, red, green, grey and sand
Sizes	500 x 500 mm 1.000 x 1.000 mm
Thickness	30 mm, 40 mm and 45 mm Other thicknesses available on request.
