

ASLON® WALKWAY TILES

The Aslon® Walkway Tiles are designed to provide a safe rubber walkway on roofs. In addition, they are the ideal solution for protecting the roof surface.

The tiles are water-permeable and feature a studded structure on the underside, allowing (rain) water to drain away immediately and the surface to dry quickly. The non-slip texture reduces the risk of slipping.

APPLICATIONS: ROOFS

These tiles are used on flat roofs to create a walkway, with the exception of PVC roof coverings. This ensures that technical installations are easily accessible for maintenance and repairs. It also helps protect the roof surface and reduces the risk of slipping due to the non-slip texture. The walkway tiles can be combined with the Aslon® Demarcation Tiles.

PIN/HOLE CONNECTION

The tiles are supplied with a pin/hole connection, allowing the rubber tiles to be interconnected using four plastic pins.

SPECIFICATIONS

Colour	black
Sizes	1.200 x 600 mm
Thickness	30 mm

WATER-PERMEABLE

The tiles have a studded structure on the underside and immediately drain (rain) water.

PREVENTS SLIPPING

The tiles are slip-resistant, thereby minimizing the risk of slipping.

SUSTAINABLE

The tiles are made from recycled rubber granulate and are fully recyclable after use.
