

ASLON® RUBBER MOUNTING BLOCK 50 MM

Aslon® mounting blocks are made from recycled rubber and provide effective sound and vibration damping. Thanks to their shock-absorbing properties, they protect technical installations and contribute to a quiet environment.

With a height of 50 mm, the mounting blocks are highly suitable as a stable base in situations where height may be an issue, such as in enclosures or confined spaces.

INTEGRATED MOUNTING RAIL

Each mounting block is equipped with an integrated aluminum mounting rail and can be supplied with a convenient mounting kit. This enables quick and efficient installation.

The mounting blocks are highly versatile and suitable for a wide range of applications, including cable trays, piping, air handling systems, and air conditioning installations.

ALUMINUM UNDERSIDE FOR PVC ROOFS

For roofs with PVC roofing, the mounting blocks are also available with an aluminum foil layer on the underside. The foil prevents the migration of plasticizers, allowing the mounting blocks to be installed safely.

SPECIFICATIONS

Color: black
Width: 100 mm
Height: 50 mm
Lengths: 125 mm | 250 mm | 400 mm
600 mm | 1.000 mm

The blocks are available individually or as a set.

SOUND DAMPENING

The rubber mounting blocks provide sound and vibration damping, contributing to a quieter environment.

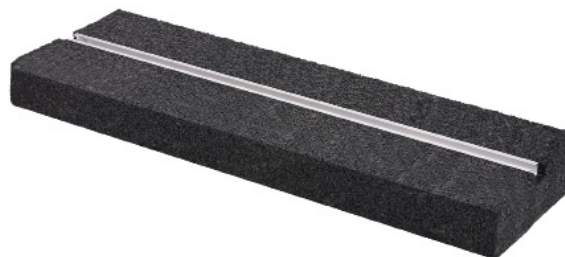

EASY INSTALLATION

With the mounting kits, installations can be easily mounted on the integrated aluminum mounting rail of the blocks.

PROTECTIVE

The use of the rubber mounting block minimizes the risk of damage to the roof surface.
