

ASLON® CANTED SECTION

The canted section is an ideal solution for bridging thresholds, curbs and other obstacles in and around the house. The rubber canted section offers a number of advantages in terms of safety, accessibility and floor protection.

The canted section is designed to increase safety, especially in places where stairs, slopes or raised thresholds are present. With an anti-slip surface, it provides extra grip and stability, reducing the risk of slipping or falling.

For wheelchair users, people with mobility problems and even for cars, carts and wheelbarrows, threshold-free access is essential. The canted section provides a seamless transition for thresholds and raised surfaces, giving everyone easy access.

PROTECTION OF FLOORS

In addition to safety, the canted section also provides protection to the underlying floor. It prevents wear and damage that can occur when vehicles, heavy loads or furniture are moved over thresholds.

SPECIFICATIONS

Colour	black
Sizes	800 x 100 x 20 mm 1.000 x 100 x 20 mm 800 x 200 x 30 mm 1.000 x 200 x 30 mm 500 x 200 x 43 mm 800 x 200 x 43 mm 1.000 x 200 x 43 mm
