

ASLON® DESIGN TEGELS

The design tiles are a stylish flooring solution for balconies, roof terraces and gardens. The design gives a beautiful and luxurious look.

Design tiles have a number of excellent properties. They are permeable to water, preventing puddles from forming on the rubber tiles. Because they absorb both sound and impact, they are particularly suitable for balconies and rooftop terraces. They can be installed directly onto roofing surfaces and are easy to use. In the garden, they provide a safe surface around swimming pools and jacuzzis/hot tubs. Their non-slip texture helps reduce the risk of slipping.

SUSTAINABLE

The rubber tiles are made from recycled rubber granulate, making them a fully sustainable option that can be 100% recycled after use.

CUSTOM DESIGN

In addition to our standard designs, it is also possible to create your own custom design.

WATER-PERMEABLE

The tiles feature a studded underside that allows (rain)water to drain away immediately.

SHOCK-ABSORBING

The tiles effectively absorb impact and vibrations.

SUSTAINABLE

The tiles are made from recycled rubber granulate and are fully recyclable after use.

SPECIFICATIONS

Colours	black, red, green, grey and sand
Sizes	500 x 500 mm
Thickness	25 mm
