

ASLON® EARTHGRASS TILES

The Aslon® EarthGRASS tiles combine a beautiful, natural appearance with the benefits of a rubber tile. They are ideal for areas where durability and ease of maintenance are of great importance.

APPLICATION: BALCONY

EarthGRASS tiles are highly suitable as a terrace flooring for balconies and roof terraces. They absorb sound and vibrations, contributing to a quiet and pleasant environment. In addition, they are water-permeable: the studded structure ensures direct drainage of rainwater, allowing the surface to dry quickly.

AVAILABLE IN TWO COLORS

The rubber tiles are available in two different earth tones: light grey and sand. Thanks to their duo-tone appearance, they give a balcony or (rooftop) terrace a beautiful, natural look.

WATER-PERMEABLE

The tiles have a studded structure on the underside and immediately drain (rain) water.

SCHOK-ABSORBING

The tiles effectively absorb impact and vibrations.

SUSTAINABLE

The tiles are made from recycled rubber granulate and are fully recyclable after use.

SPECIFICATION

Colours	Stone grey Sandy beach
Sizes	400 x 400 mm 500 x 500 mm 1.000 x 1.000 mm
Thickness	25 mm en 30 mm
Water-permeable	250 mm/h2
