

ASLON® NATUREGRASS TILES

The artificial grass tile is a high-quality product in which the artificial grass is pressed onto the rubber tile during the production process, without reducing its water permeability. Thanks to the artificial grass top layer, balconies and (roof) terraces gain a natural and luxurious appearance.

APPLICATIONS (ROOF) TERRACE OR GARDEN

Artificial grass tiles can be easily and directly installed on top of roofing membranes. When renovating a balcony, they are an excellent choice, as they can be laid over an existing floor. They also reduce noise and vibrations, contributing to a calm and comfortable atmosphere on balconies and roof terraces.

APPLICATIONS: PLAYGROUND EQUIPMENT

For playgrounds, artificial grass tiles provide a safe, impact-absorbing surface. They combine safety with fun and give the play environment an attractive appearance. The tiles meet the strictest safety standards for fall protection and impact attenuation.

WATER-PERMEABLE

The tiles have a studded structure on the underside and immediately drain (rain) water.

SHOCK-ABSORBING

The tiles effectively absorb impact and vibrations.

NATURAL LOOK

The tile combines the comfort of rubber with a natural look, all year round.

SPECIFICATION

Colour	Moss green Forest green
Sizes	400 x 400 mm 500 x 500 mm 1.000 x 1.000 mm
Thickness	25 mm (fall heights 0.75 meters) 30 mm (fall heights 0.97 meters)
