

ASLON® TILES SUPPORTS

The tiles supports are versatile and provide a solid base for the installation of terrace tiles, decking boards, and technical installations. The advantage of tiles supports is that they help compensate for uneven surfaces and accommodate different height levels when installing rooftop terraces, air conditioning units, or solar panels.

By using tiles supports, the risk of damage to the subfloor is reduced. They prevent water stagnation and promote drainage due to their permeable properties.

The tiles supports provide a stable base for rooftop terraces, technical installations, and other rooftop applications. They are made from durable and weather-resistant rubber, ensuring a long service life.

SPECIFICATIONS

Colour	black
Sizes	90 x 60 x 3 mm 90 x 60 x 8 mm 100 x 100 x 10 mm Other sizes available on request.

FLOOR PROTECTION

The tiles supports provide a stable surface and offer a solid base for installation.

EASY TO INSTALL

The tiles supports are very user-friendly and are mainly used outdoors.

SUSTAINABLE

The tiles supports are made from recycled rubber granulate and are fully recyclable after use.
