

ASLON® EPDM RECYCLED TILES

The Rubber tiles for playgrounds are fall-breaking and ensure the optimal combination of safe play and fun. They are water-permeable and have a stud structure on the underside, so that (rain)water is drained directly and the surface dries quickly.

These rubber tiles are constructed with an underlayer of recycled SBR and a top layer of coated EPDM. This means that the rubber tile is made entirely of recycled material. They comply with all requirements according to the applicable PAH regulations and all REACH guidelines. In addition, the rubber playground tiles are suitable for sports and play and are tested for fall heights; Head Injury Criterion (HIC).

Installation of the rubber tiles is very simple. They are placed on a flat and well-prepared surface and can be put into use quickly. The rubber tiles are equipped with a pin/hole connection, allowing them to be optionally linked together using plastic connecting pins.

FALL-BREAKING

The EPDM tiles meet the most strict standards for fall protection in accordance with N1177:2018.

SOUND REDUCING

The rubber helps reduce contact noise and vibrations.

SUSTAINABLE

The tiles are made from recycled rubber granules and are fully recyclable after use.

SPECIFICATIONS

Colours	Black, red, green and grey
Dimensions	500 x 500 mm 1.000 x 1.000 mm
Thicknesses	30, 45, 50, 65, 80 and 100 mm
Fall height (HIC)	30 mm - 1,00 meter 45 mm - 1,37 meter 50 mm - 1,49 meter 65 mm - 1,90 meter 80 mm - 2,16 meter 100 mm - 3,00 meter
