

ASLON® RUBBER PROTECTION PROFILE

The protection profile is used with existing sandboxes with a concrete edge. The rubber profiles are placed over a concrete edge, making a sandbox soft, safe and child-friendly. Moreover, this profile provides a comfortable seat for children.

The protection profile is supplied with three 80 mm connecting pins, which allow the profiles to be interconnected. This creates a beautiful whole, where children can play carefree and safely.

SHOCK ABSORBING

The rubber profiles help absorb bumps and shocks.

PROTECTION

The rubber profile provides extra protection upon contact with hard edges and corners.

SUSTAINABLE

The profiles are made from recycled rubber granules and are fully recyclable after use.

SPECIFICATIONS

Colours	Black, red and green
Dimensions	1.000 x 400 x 150 mm including 3 connecting pins, 80 mm each
