

ASLON® H-PAVERS

Aslon® H-pavers provide a soft and comfortable surface in and around stables. The H-pavers are wear-resistant, water-permeable and made of recycled rubber granulate and provide noise reduction.

The natural anti-slip structure prevents slipping and provides a resilient surface for the horse's well-being. The H-pavers can be used in stables, walkways, grooming areas and in the horse walker.

Because they are loose stones, they are easy to clean or replace. In addition to giving a beautiful appearance, it also provides sound insulation. The rough surface reduces the risk of injuries and provides a safe environment for the horses.

ANTI-SLIP

The natural anti-slip texture prevents slipping and provides a resilient surface that supports the horse's well-being.

SHOCK-ABSORBING

They have shock-absorbing properties, reducing the impact on horses' joints.

SUSTAINABLE

The H-pavers are made from recycled rubber granulate and are fully recyclable after use.
