

ASLON® STABLE TILES

Aslon® Stable tiles can be used in various stable environments, ranging from individual boxes to free stalls and washing and spraying areas for a comfortable surface.

Stable tiles can be placed on various types of surfaces. The tiles have excellent shock-absorbing properties, reducing the impact on horses' joints and the risk of injuries. They help to reduce noise levels in the stable and provide a rough surface to prevent slipping.

The stable tiles are wear-resistant, ammonia-resistant and provide good insulation from cold surfaces. Moreover, these tiles in the horse stable are easy to clean and can reduce the consumption of bedding such as straw.

SPECIFICATIONS

Colour:	black
Sizes:	500 x 500 mm and 1.000 x 1.000 mm
Thickness:	30 mm and 40 mm

WATERPERMEABLE

The stable tiles have a studded structure on the underside, allowing water and urine to drain away directly.

SHOCK-ABSORBING

They have shock-absorbing properties, reducing the impact on horses' joints.

SUSTAINABLE

The stable tiles are made from recycled rubber granulate and are fully recyclable after use.
