

Aslon® stable H Paver & mat

Aslon® stable H pavers and H-mats are wear-resistant, water-permeable and made of recycled rubber granulate. Their non-slip structure prevents slipping and they are also resistant to point and twist loads. Both variants have a fixed location and can be used both on sand and on hard surfaces. The H paver and H mats are ideally suited as a footpath in stables or in the yard and as a safe substrate in treatment rooms.

The Aslon H paver can be used in training mills and can be combined with concrete clinkers. Because of its profile, the Aslon H-mat can be placed quickly, easily and seamlessly.

Colour: Black | Red

Size H Brick: 200 x 165mm

Size H mat: 1.120 x 1000mm

Thickness H Brick: 43 mm

Thickness H Mat: 15mm | 30 mm | 43mm

Water permeability: 960mm/h EN 12616

Density: 900 kg/m³

Protective | Insulating | Easy installation
Wear-resistant | Sound absorbing

Aslon Rubber is aware that the welfare of our planet deserves all of our attention. The following generations must be able to live in a healthy environment. For this reason, we make all of our products out of recycled granulated rubber obtained from items such as scrap car tyres. This enables us to preserve valuable raw materials and minimise energy consumption and the emission of harmful substances.
