

Aslon® stable tiles

Aslon® stable tiles are wear-resistant, ammonia proof and made from recycled rubber granulate. The stable tiles ensure that the horses are comfortable and the horses have less chance of slipping when getting up. Due to the stud structure at the bottom, they are moisture permeable, making them also suitable for use in the washing area. In addition, the tiles are easy to clean and in combination with the rubber stable tiles, the consumption of the ground cover such as straw can be reduced, saving on disposal

Colour:	Black
Size:	1.000x 1.000 mm
Thickness:	30 mm 40 mm
Water permeability:	960mm/h EN 12616
Density:	900 kg/m ³

Protective | Insulating | Comfortable
Wear-resistant | Sound absorbing

Aslon Rubber is aware that the welfare of our planet deserves all of our attention. The following generations must be able to live in a healthy environment. For this reason, we make all of our products out of recycled granulated rubber obtained from items such as scrap car tyres. This enables us to preserve valuable raw materials and minimise energy consumption and the emission of harmful substances.
