

Aslon® EPDM tile

EPDM (Ethylene Propylene Diene Monomer) tiles are rubber tiles with a 5 to 8-mm EPDM rubber top layer. EPDM rubber is a new, colourfast synthetic rubber. EPDM tiles are sound-absorbing and ideal for use in health clubs and gyms.

EPDM tiles for health clubs and gyms
Aslon EPDM tiles are available in various RAL colours and blends. The different tile colours can be combined to create a contemporary and colourfast floor. Moreover tiles featuring colour blends can be used to achieve a beautiful floor.

Pin/hole connection

Aslon EPDM tiles with a thickness of 30 mm and thicker are available with a so-called pin/hole connection. This type of tile has four holes on two of its four sides. Individual tiles are joined together by inserting plastic pins into each of the four holes.

Specifications:

Colours:	black, black with 10% EPDM and 100% EPDM
Dimensions:	250 mm x 500 mm 500 mm x 500 mm 1.000 mm x 1.000 mm
Thicknesses:	flatt: 15mm, 20mm en 30mm with studs: 30mm, 40mm en 45mm
Density:	800 kg/m ³ , 900 kg/m ³ en 1.000 kg/m ³
Granulate:	fine 0,7 - 1 mm standard 1 - 3 mm

Benefits:

- ✓ Provides impact protection
- ✓ Sound-absorbing
- ✓ Low-maintenance
- ✓ Hard-wearing
- ✓ 100% recyclable
- ✓ Colourfast top layer
- ✓ Lightweight
- ✓ Many colours and blends possible
