

RUBBER

Aslon® outdoor fitness tile

Aslon outdoor fitness tiles are sound absorbing, comfortable to sport on and produced from recycled rubber granulate and therefore 100% recyclable after use. The tiles provide cushioning and protection. Aslon outdoor fitness tiles are easy to lay and maintenance friendly. The tiles must be laid on a hard supporting surface, like cement or asphalt. The best floor with stability is achieved by the use of tiles in a half-brick bond. It's very easy to replace the tiles if damaged or to repair areas of wear. Due to their excellent porosity in combination with the studded bottom structure it allows rain water to drain away immediately and the rubber tiles dry in short time. Our rubber tiles have a porosity of > 920 mm per hour in accordance with EN 12616.

Colors: black, red, green and grey

Dimensions: 1.000 x 1.000 mm | 500 x 500 mm

Thicknesses: 30, 40 and 45 mm

Density: 800 kg/m³ | 900 kg/m³ | 1.000 kg/m³

Water permeability: 920 mm/h

Impact protection | Easy to lay
Porosity | Low-maintenance

Aslon Rubber is aware that the welfare of our planet deserves all of our attention. The following generations must be able to live in a healthy environment. For this reason, we make all of our products out of recycled granulated rubber obtained from items such as scrap car tyres. This enables us to preserve valuable raw materials and minimise energy consumption and the emission of harmful substances.
