

## Aslon® Mounting bar with alu rail

The Aslon® Rubber Feet is manufactured from recycled solid rubber and has an integrated aluminium mounting rail that is made sunk into the beam.

The ground block has a hollow bottom surface so that the water flow is not blocked and the assembly block prevents vibration. With the use of these siderails, the installation of an air conditioning or heat pump on flat roofs, conservatories, balconies, etc. is simple and is saving time.

Including installation material

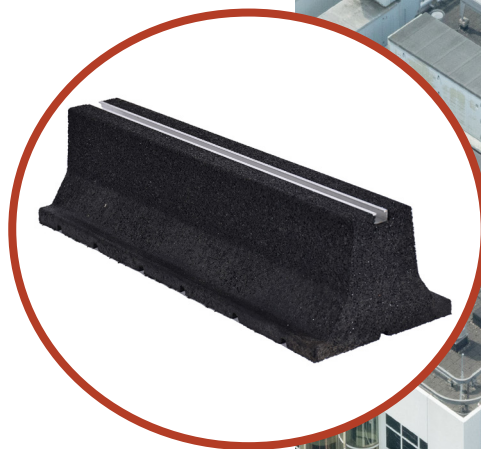

Aslon Rubber is aware that the welfare of our planet deserves all of our attention. The following generations must be able to live in a healthy environment. For this reason, we make all of our products out of recycled granulated rubber obtained from items such as scrap car tyres. This enables us to preserve valuable raw materials and minimise energy consumption and the emission of harmful substances.

**Size:** 600 x 200 mm  
1.200 x 200 mm

**Height:** 150 mm

**Shock-absorbing | Protection Roof**  
**Sound reduction | frost-resistant | Recyclable**
