

RUBBER

Aslon® artificial grass tiles

Artificial grass tiles are rubber tiles to which a top layer of artificial grass has been applied. The artificial grass is pressed onto the rubber in such a way that the tile remains porous.

The advantage of artificial grass tiles is that compared to standard rubber tiles, they have a softer and more luxurious top layer.

The drainage structure featured on the artificial grass tiles ensures that water is channelled away quickly leaving the artificial grass to dry out in a short time. Without drainage, artificial grass can stay wet for a long time.

Colour: green

Sizes: 400 x 400 mm
500 x 500 mm
1.000 x 1.000 mm

Thicknesses: 30 mm

Water permeability: 250 mm/u

Porosity | Fall protection | Easy to lay
Sound absorbing | Low maintenance

Aslon Rubber is aware that the welfare of our planet deserves all of our attention. The following generations must be able to live in a healthy environment. For this reason, we make all of our products out of recycled granulated rubber obtained from items such as scrap car tyres. This enables us to preserve valuable raw materials and minimise energy consumption and the emission of harmful substances.
