

RUBBER Aslon® rubber tiles

Aslon Roof tiles offer a number of excellent features, one of these being that our roof tiles are porous so that water can drain through them and be channelled away along the studded underside.

Aslon roof tiles on the balcony

Besides being used on roof-terraces, our tiles are frequently used as balcony flooring.

Aslon roof tiles as walkways on roofs and extensions

The walkways provide protection for the roofing and allow access to installations when repairs need to be carried out. On roofs around the home (on bays, garages, sheds and extensions) the tiles are laid so it is possible to use ladders etc. without damaging the roofing.

Colours: black, red, green and grey

Sizes: 500 x 250 mm
500 x 500 mm
1.000 x 1.000 mm

Thicknesses: 30, 40, 45, 50 and 65 mm

Water permeability: 920 mm/u

Lightweight | Water-permeability | Easy to fit
Sound absorbing | Frost resistant | Recyclable

Aslon Rubber is aware that the welfare of our planet deserves all of our attention. The following generations must be able to live in a healthy environment. For this reason, we make all of our products out of recycled granulated rubber obtained from items such as scrap car tyres. This enables us to preserve valuable raw materials and minimise energy consumption and the emission of harmful substances.
