

Aslon[®] Rubberpads

Aslon rubber pads prevent damage, mould and other imperfections on decking boards, garden tiles and on roofs.

The rubber pads allow space for drainage and support pots, tiles or other objects. They also offer good ventilation so that there is no longer a problem with dirt and insects. Aslon rubber pads are produced from recycled rubber granulate and are available in various thicknesses and dimensions.

Rubber pads are used under flower and plant trays, garden furniture, concrete tiles, natural stone, decking boards and for aluminium substructure.

Specifications:

Colours:
black

Sizes:
